PRANAY DHANVE

Information Security Analyst - Threat Hunting & Detection Engineering

Pune, India | pranayd.work@gmail.com | +91 9359954933 | linkedin.com/in/pranaydhanve | github.com/pranaydhanve

PROFESSIONAL SUMMARY

Information Security Analyst with 1.5+ years of experience in SOC operations, proactive threat hunting, and detection engineering across SIEM (Splunk, Wazuh, Rapid7 InsightIDR) and EDR (CrowdStrike Falcon) platforms. Skilled in monitoring network traffic and system logs, analyzing threat vectors and exfiltration techniques, and validating/enriching Indicators of Compromise (IOCs) against the MITRE ATT&CK framework to close detection gaps and reduce false positives. Certified in penetration- testing methodology (Mile2 C)PTE, C)PEH) for an attacker- informed approach to vulnerability analysis. Proficient in Python and PowerShell for security automation, with working knowledge of Windows/Linux administration and cloud security (AWS, Prisma Cloud CSPM). Customer-oriented and eager to learn, staying current with the evolving cybersecurity threat landscape.

TECHNICAL SKILLS

- **SIEM & Detection Engineering:** Splunk, Wazuh, Rapid7 InsightIDR, CloudSEK XVigil
- **EDR & Endpoint Security:** CrowdStrike Falcon, Halcyon Anti- Ransomware, Cisco Umbrella
- **Threat Intelligence & Frameworks:** MITRE ATT&CK, IOC Validation & Enrichment, OWASP Top 10, NIST IR, Malware Analysis Concepts
- **DLP & Email Security:** Trellix DLP, Cisco DLP, Palo Alto Strata DLP, Cisco IronPort, MXToolbox
- **Cloud Security:** Prisma Cloud (CSPM), AWS Cloud Security Concepts
- **Vulnerability Assessment & Pentesting:** Metasploit, Burp Suite Professional, Nessus, Nmap, Wireshark, Kali Linux
- **Scripting & Systems:** Python, PowerShell (Basic), Bash, SQL, KQL, Windows OS, Linux Administration

EXPERIENCE

Junior Information Security Analyst - Onity Group Inc. *Jun 2025 - Present*

- Conduct proactive threat hunting and monitor network traffic and system logs across SIEM and EDR platforms (Splunk, Rapid7 InsightIDR, CrowdStrike Falcon) to identify, analyze, and triage potential security threats and unusual activity.
- Validate and enrich Indicators of Compromise (IOCs) using threat intelligence sources, correlating findings against the MITRE ATT&CK framework to close detection gaps and speed up triage and escalation decisions.
- Investigate and close 50+ monthly DLP alerts (Trellix, Cisco, Palo Alto Strata), mapping incidents to upload and clipboard exfiltration techniques and helping improve detection logic to reduce false- positive rates.
- Triage quarantined phishing emails via Cisco IronPort and MXToolbox, identifying targeted campaigns and streamlining escalation workflows to speed analyst response time.
- Manage endpoint security compliance for 500+ assets using CrowdStrike Falcon and Cisco Umbrella, coordinating remediation with IT teams, and tune Halcyon anti- ransomware detection policies to strengthen ransomware resilience.
- Monitor cloud and network anomalies (Prisma Cloud, Rapid7 InsightIDR, CloudSEK XVigil), escalating high- priority findings through structured incident- response procedures, and document findings and methodologies for knowledge- sharing.

Security Intern - HackerCentral *Aug 2024 - Mar 2025*

- Executed network penetration assessments using Kali Linux, uncovering misconfigurations and potential exfiltration routes; documented 10+ vulnerabilities with CVSS- based scoring and remediation recommendations for stakeholders.
- Built internal attack- simulation and training labs modelled on TryHackMe/HackTheBox formats to test detection capabilities and improve team proficiency in threat identification.

PROJECTS

Automated Web Application Security Scanner - Python, Selenium, Burp Suite API

- Engineered an automated scanner with headless- browser testing and payload fuzzing to detect SQLi, XSS, and CSRF vulnerabilities; generated structured reports for triage and escalation workflows.

Deepfake Audio- Visual Detection System - Python, Deep Learning (ResNeXt, BiLSTM)

- Built a hybrid deep- learning pipeline combining spatial (ResNeXt) and temporal (BiLSTM) encoders with audio- visual fusion for deepfake media detection, trained on FaceForensics++ and DFDC.

Threat Analyser & Detector - JavaScript, HTML

- Built a real- time, browser- integrated tool to intercept and block malicious file downloads before they reach system directories, simulating endpoint DLP logic.

CERTIFICATIONS & ACHIEVEMENTS

- **C)PTE** - Certified Penetration Testing Engineer, Mile2 (Feb 2025 - Nov 2028)
- **C)PEH** - Certified Professional Ethical Hacker, Mile2 (Nov 2024 - Nov 2027)
- **TryHackMe PT1 Certified Penetration Tester** - Ranked 9th nationally (India) in the "Love at First Breach" CTF, competing against hundreds of participants as team lead of ButterOverflow.

EDUCATION

B.E. Computer Engineering (Honours in Cyber Security) - Savitribai Phule Pune University | 8.95 CGPA | 2025- 26

Coursework: Machine Learning, Blockchain Technology, Software Testing & Quality Assurance, Design and Analysis of Algorithms

Higher Secondary Certificate (HSC) - Maharashtra State Board | 94.67% | MHT- CET: 97.36 Percentile
